§ 140-20.8-505 Exceptions

For the purposes of determining compliance within these regulations, the following are to comply with the prohibition against smoking as regulated entities or areas in the following manner:

- (a) Bars, including open air bars, until the earlier of an established time when the kitchen ceases servicing meals or 10:00 p.m., provided that smoke does not infiltrate into areas where smoking is prohibited.
- (b) Attached bars until the earlier of an established time when the kitchen ceases servicing dinner meals or 10:00 p.m., provided that smoke does not infiltrate into areas where smoking is prohibited. Because ventilation systems are inadequate to prevent second-hand smoke, whenever smoking occurs or is permitted in an attached bar area of a restaurant under this provision, any smoking including second-hand smoke shall be controlled through complete and separate enclosures such as enclosed glass windows; separate entrances; and sealed doors from the dining area and/or dining patrons, after 10:00 p.m. Ventilations or exhaust fans are deemed insufficient to control infiltration or drift of smoke from the permitted smoking area. Total and separate enclosures are required.
- (c) Private residence used as a licensed child care, adult day care, or health facility;
- (d) No more than 20% of rooms rented to guests in an establishment may be designated as smoking. Room reservations should be for non-smoking rooms unless a customer specifically requests for a smoking room.
