

TITLE 2: NATURAL RESOURCES
DIVISION 7: BUILDING AND ZONING CODES

§ 7152. Architectural Review Standards.

Within one year from February 2, 1990, the building safety official shall prepare a set of architectural design standards to apply to all buildings, except owner-built, owner-occupied dwellings, constructed within 150 feet of the center line of Beach Road and the west coast highway between Puntan Agingan and the war memorials at Suicide Cliff. The architectural review standards shall establish quantifiable criteria regarding off-street parking space, landscaping, building heights and such other architectural or design features as the building safety official deems appropriate to provide for the creation and preservation of an aesthetically pleasing thoroughfare, compatible with needs of the tourism industry and the life of the villages through which these roads pass. The building safety official shall submit the architectural review standards in statutory form to the legislature for enactment into law.
