

TITLE 2: NATURAL RESOURCES
DIVISION 7: BUILDING AND ZONING CODES

§ 7153. Issuance of Building Safety Code Regulations.

Within 180 days of February 2, 1990, the building safety official shall issue and implement building safety code regulations specifying codes and standards for all construction to which this code applies with respect to such standards in general, and for specific mechanical, electrical, and plumbing installations, air conditioning systems, water treatment plants, electrical generators, boiler installations, fire protection and energy and water conservation materials, procedures and design criteria, as well as procedures for the application and issuance of building and occupancy permits, inspections, and other matters of construction not specifically covered by this building code.
