

TITLE 4: ECONOMIC RESOURCES
DIVISION 8: UTILITIES

§ 8207. Emergency Excavation or Demolition.

Compliance with the notice requirements of 4 CMC § 8205 is not required of persons responsible for emergency excavation or demolition to ameliorate an imminent danger to life, health, or property, provided, however, that those persons give, as soon as practicable, oral notice of the emergency excavation or demolition to each operator having underground utilities located in the area where that excavation or demolition is to be performed and request emergency assistance from each operator so identified in locating and providing immediate protection to its underground utilities. An “imminent danger to life, health or property” means whenever there is a substantial likelihood that loss of life, health or property will result before the procedure under this chapter can be fully complied with.
